ABOUT OUR COMPANY

OUR PASSION FOR LANDSCAPING INNOVATION SINCE 2000

1- Decades of excellence in landscaping

"Established in 2000, we've spent over two decades improving our skills and deepening our roots in the landscaping industry. With a legacy built on experience and innovation, we understand what it takes to transform outdoor spaces into breathtaking, smart, and sustainable landscapes."

2- Trusted experts in tailored, sustainable landscape maintenance

From intimate gardens to expansive commercial grounds, we maintain green spaces of every scale. No project is too niche, and no detail is overlooked. With flexible scheduling and customized care, we craft plans tailored to your unique needs and budget—ensuring your outdoor space thrives sustainably, year-round."

3- Our higher standards :

Higher standards mean smart innovation, sustainable precision, and 20+ years of expertise—crafting breathtaking landscapes with trusted partners and tailored care built to last.

ABOUT PAGE:

Our Mission:

◆ Design

"Unique, sustainable environments through smart, tailored solutions—where nature thrives and communities flourish. From landscaping roots in 2000 to multidimensional innovation, we blend technology with sustainable practices to set trends that matter."

◆ Elevate

We elevate our legacy of excellence by exceeding expectations. Through teamwork and unwavering commitment, we deliver adaptable designs that grow with your needs, ensuring every project reflects quality, care, and forward-thinking solutions.

◆ Inspire

We inspire our team's potential through development and skill-building, ensuring every client benefits from sharper expertise and deeper care. By investing in people, we invest in your experience.

Our Vision

"By designing green spaces that listen to both people and the planet, we unite smart solutions with sustainable practices. Through adaptable designs and thoughtful care, we craft landscapes that grow with communities—ensuring beauty, innovation, and nature thrive together."

A word from our CEO

"At I Green, we believe landscaping is more than just design—it's about creating smart, sustainable spaces that enhance everyday living and bring joy. With over 20 years of experience, we blend innovation and customization to unite nature and technology. Whether it's a small garden or a large-scale project, our commitment remains the same: precision, quality, and care in every detail. Thank you for trusting us to bring your outdoor vision to life."

Services content

1- softscape and Irrigation networks

1. Softscape expertise At I Green, we design beautifully balanced gardens where lush lawns, shrubs, trees, and palms unite to create timeless landscapes. With over two decades of expertise and our own nursery, we provide top-quality plants tailored to your vision—ensuring your outdoor space thrives with harmony, precision, and care.

2. Irrigation Networks At I Green, we craft smart irrigation systems that deliver water precisely where and when plants need it. From semi-automatic setups to fully automated networks equipped with weather-responsive technology, our solutions adapt to any environment and scale. Partnering with the world's top suppliers, we use trusted components to ensure your landscape stays lush, efficient, and worry-free.

Added Belief Statement: "We believe softscape and irrigation networks must work hand-in-hand to create landscapes that thrive sustainably, ensuring every plant receives the care it needs to flourish."

2-Hardscape, water features, lighting fixtures

Hardscape Excellence We design and install durable, aesthetic paved areas—marble plazas, granite entrances, and rustic patios. Our custom pergolas blend form and function, elevating landscapes with timeless structure.

Water Features with Purpose "Design pools, waterfalls, or fountains tailored to your space. From horizon pools to marble waterfalls, every feature blends with nature to enrich your landscape."

Lighting as Art & Science Transform landscapes with smart lighting: pathway safety, water accents, or texture highlights. We install systems (pools, up lights, and panels) that turn nightscapes into captivating art.

Our Philosophy: We believe lighting, hardscape, and water features are inseparable partners in sustainable design. By integrating these elements seamlessly, we ensure each project tells a story and every detail works in harmony to create spaces that inspire, endure, and evolve with nature.

3-events

"At I Green, we're excited to introduce our newest service: Events! In partnership with Cairo Tech Summit, we bring you exceptional event experiences tailored to any occasion. Whether it's a wedding, corporate gathering, or special celebration, our expert team designs and executes breathtaking themes, turning your vision into reality. From elegant décor to essential event equipment, every detail is taken care of—creating unforgettable moments with style and precision."

4-SOLAR ENERGY & CENTRAL HEATING SOLUTIONS

Solar Energy Solutions

At I Green, we provide smart, sustainable solar energy solutions tailored to every need. From off-grid and on-grid systems to solar-powered irrigation, we integrate cutting-edge technology with expert design to maximize efficiency and reduce energy consumption.

- **Off-Grid Systems:** Reliable, independent power for remote locations, ensuring seamless energy access without reliance on the public grid.
- **On-Grid Systems:** Generate your own energy while seamlessly transferring excess power back to the grid, optimizing efficiency and sustainability.
- **Solar-Powered Irrigation:** A fully self-sufficient system that powers all types of pumps, delivering efficient water management powered by the sun.

With innovative solutions and expert support, we bring the future of energy to your outdoor space.

Central Heating Solutions

At I Green, we bring warmth and efficiency to every space with our advanced **central heating systems**. Designed for comfort, luxury, and sustainability, our solutions include **wall-mounted and floor heating systems**, using premium Italian, Turkish, and German materials that meet international quality standards.

- **Wall-Mounted Systems:** Gas-powered boilers connected to radiators, offering rapid heating, modern design, and easy installation.
- **Floor Heating Systems:** A discreet, energy-efficient solution with underground pipes distributing warmth evenly, preserving aesthetics while maximizing comfort. With smart technology and expert installation, we deliver seamless heating solutions tailored to your needs.

5- ****3D Design****

"We create high-quality, affordable 3D designs that bring your outdoor vision to life—quickly and with precision. Our detailed renderings help you visualize every element of your landscape before construction begins, ensuring a seamless transformation."
